

“What a great app! This is the app which makes admin life much easier. Published applications work perfect. Thanks for this one Citrix.”

Customer review
BlackBerry App World

On-demand access to enterprise apps, desktops and IT services from any device

Citrix® makes it simple and fast to get on-demand and high-performance access to your virtual desktop, Windows®, Web and SaaS apps or IT services from any device—whether a smartphone, tablet, netbook or PC. With an easy to use interface that is optimized for each platform, including the latest Android based devices, Citrix Receiver™ software lets you work from anywhere. Open and review documents, update reports, approve expenses and even join a webinar—right from the palm of your hand.

People want freedom, IT wants control

The explosion of new devices entering the workplace including a wide variety of smartphones and tablets is creating increased requirements for IT. Employees want fast, simple, self service access to Windows, Web and SaaS applications and desktops from any device they choose. IT needs a secure and scalable infrastructure for delivering apps and desktops to these devices. Citrix Receiver solves this dilemma by giving users and IT exactly what they want.

Citrix Receiver for anytime access on any device

Receiver is a lightweight software client that runs on all major mobile platforms, including Android, BlackBerry®, Windows® Mobile, Symbian® and iPhone® and makes it simple for professionals to work from anywhere. With Receiver installed, IT has complete control over security, performance and user experience while providing end users with fast and familiar access to all their enterprise Windows applications and virtual desktops.

Key Benefits

Work anywhere with any device

Gain flexibility to work from anywhere with instant, real-time access to your Windows desktop, Windows, Web and SaaS applications, IT services and documents from home, the office or on the road. Universal browser support gives a seamless access experience to any virtual desktop, enterprise application or IT service from either Internet Explorer, Chrome, Firefox or Safari on any device.

Safe and secure data

Keep corporate data—including e-mail, intellectual property and confidential information—safe and secure on your company network not on the device with only keyboard input, screen gestures and screen updates sent across the network. With centralized management, IT always has complete control and visibility of the user experience.

Simple, intuitive navigation

Citrix Receiver extends your device's capabilities by allowing for simple interaction with your desktop and thousands of Windows, Web and SaaS applications and documents using intuitive gestures to zoom, pan, click, scroll and type with ease.

High definition experience

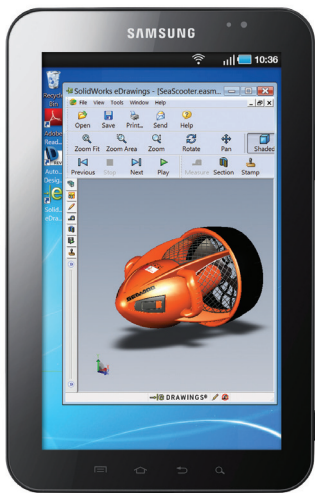

View multi-media content including Flash™—based web sites and even 3D vector-based graphics with a high performance experience over any network connection.

Getting Started is Only a Free Download Away

Citrix Receiver is available for free at www.citrix.com/receiver BlackBerry App World, iTunes Store® and the Android Marketplace. Once installed, Receiver securely connects to an organizations' virtual desktop and application infrastructure powered by either Citrix® XenDesktop® or Citrix® XenApp™.
